

Ask Cinderhaven — Am I about to get hit with OTIF penalties I can't see?

baseline scenario — figures reconcile to OTIF Blind Spot

Am I about to get hit with OTIF penalties I can't see?

4,006 of 46,760 shipments (8.6%) had late ASNs — a Walmart OTIF violation even when the physical delivery arrived on time. At \$25 per incident, that's \$100,150 in exposure at current run rate. Worst account: Walmart at 8.9% late ASN rate. Physical delivery is 95.8% on time — the ASN process is the only gap.

8.6% ASN late — \$100,150 exposure

Key numbers

4,006 of 46,760	Late ASN shipments 8.6% of all shipments
\$100,150	Estimated OTIF exposure \$25 × late ASN count
95.8%	On-time delivery rate Walmart floor: 98%

How this verdict was reached

OTIF exposure = late ASN count × \$25 per incident. Fires when `asn_sent_late` rate > 5%. Walmart OTIF floor for large suppliers: 98%. Late ASN = ASN arrived after ship date (`asn_sent_late` = true in `fct_retailer_shipments`). Thresholds from OTIF Blind Spot.
